We are still cooking, we just finished up the majority for the scripting with much thanks to vlotboky for the nice work.

We are still trying to put together the buildings, the power plant has been finished, and the mining facility is under work while i spend some time tweaking out the GUI and -Tim- works on Valley Day.

Also, lest not forget Dan is recovering from a recent surgery, and should be getting the additional vehicle UVW wrapped so that we can get it textured and rigged for game use.

While i am tweaking around with the GUI, i will probably post some screenshots in our media section, so keep an eye out!
