This actually seemed like a very civil and interesting topic, so I'm going to dig it up and see if I can get it started again. Anyways:

Nod: SBH. Good for nuke raids, stealing tanks, rooting out snipers, decent against vehicles - a million and one uses! I think it would ROCK if they carried some kind of assassin's knife that you could use to kill enemies once you get right up behind them and slit their throats :twisted:

As for vehicle... I dunno yet. On any given server, you can find me driving Buggies, Light Tanks, Artilleries and Stealth Tanks almost equally. I don't like Flame Tanks because of their range, large size and big turret that makes it hard to see where your treads are pointing at times, and I don't drive APC's all that much.

GDI: Ugh... I don't really like ANY GDI infantry, but I do pretty well with Gunner. Good range, rate of fire, damage and he's pretty quick. The GDI chaingun officer is also a good bang-for-the-buck unit on infantry-only maps.

And of course, the Medium Tank.

I don't fly aircraft much anymore - they're just too easy to shoot down.
