But how far are you with it?

Can you post something already?

i havent started really working on MAPs just at the moment. im focusing on every object im going to be using, and thats gonna be well over 1000 Misc objects its self so at the time i start making the maps i can just dump it in ya no. Im currently working on the Multiplayer Time Displacement machine, its hard to explain exactly how its going to be set up for Multi but i already no LOI like every like 25 mins or so, Skynet can use the Time Displacement Machine and make the game go bak in time by like 1 min or something its going to be cool when done thoe.
and thinking bout making Skynet available to use Teleportaion devices with GPS locationing so u go to a Set distance to where u want to go.
