{IRA}IronHorse wrote on Fri, 04 August 2006 15:16Hummmm....Iron Warrior do you really think I'm going to reveal that kind of information on here with so many immature little kids such as yourself for example. I'll throw you a hint though....I use PS2 and PS3 Dev kits. Not that I expect you to know what these are but, they are used for script writing. Much different than your Renegade tools with GMax.

You are a complete fucking lying bastard Sir, and I put it to you again to prove your shit which you wont and cant, typical that huh, you been caught in your web of lies and is now crying like a child cause of it.

Again, if you work for some game company, tell us what games you have worked on and we will look up the credits.

And am no kid, which yet again proves how fucking stupid you are, I wouldnt be suspsied to find out that am infact older then you.

I feel the need to question you on your so called "marine" past, but you would only look up the answers cause your a penis pump using nerd.

As always, I pray for the day that someone inverts a programe to allow the user to stab someone in the face though the screen, it would come in very handy right now to use upon you.

Burn in hell heretic.

Edit.

You know, people like you, really do deserve to fucking die, you should had been shot at birth, stupid people like you really do offend everything human, you are a disgrace to our race and you should do the honourable thing and put a 9mm to your head and pull the trigger, I asume you would fail at that as you do at life, by leaving the safty catch on. ./

If you ever visit the UK, which I hope you dont, you can keep your lying self over there, but if you ever do, I be so happy to edit your face and remove the stain on the human race that is called hardkill.
