No question my favorite Character for either side is the Techie/Hotwire. They can do so much for so little cash, (\$350). Great for support of your allies, defending the base, and leading/finishing an assault.

The Vech. is a toss up. If our Nod and have a decent team definitely the ST. Sneak one into the base or close to it then wreck holy hell on a building while the team goes after one on the other side of the base. If Nod with bad team, the LT all the way.

GDI is GDI those that do not use the MED are doomed to die from it.
