Renx wrote on Wed, 09 August 2006 21:23: Soon there will be a patch released to fix RG on win2k/vista/64bit OSs.

I don't think that's the problem, I'm not running the 64bit version of Vista, and RenGuard does work as well as it can do, it says that it can't find the serial, because Renegade isn't installed properly. So, I think the main problem with making it work on 32bit Vista is making the Renegade Setup program work without crashing...
