---

as most of you will know i am writing a bot. but now that i am almost finished i would like to intergrate rengaard into it.

some thing i want to know:

- 1) How do i detect if someone is running rengaard?
- 2) what is the MOTD ID for?
- 3) what is the sound that play's "bsssss, doom doom. you have connected to a rengaard protected server"
- 4) how do i detect if someone has got skins or other files in their data folder.

i noticed that dragon server can do this.
