Why are you all of the sudden pissing on Adad. If it wasn't for Adad, translations and the new FDS serials would be non-existent. Talk about fucking bipolar.

As far as this thread goes, you're beating a dead horse as usual.

ps: The Final Ren hack was made by WSE and therefore has no trojans or viruses. If it was made by an EAX/GX user, then I would worry about trojans/botnets.

Pay attention to the thread. I wasn't referring to Adad, I was referring to those who claim to have damage hack detection.

Re-banned. You are not welcome on these forums.
