Alright, I'm trying to install RenGuard on my renegade server (Souljas Dedicated AOW). But when I go to run renguard_ssc.exe the command prompt comes up and right after it gets the server list, it just stays at the line "Connected to RenGuard."; and nothing happens.

Any suggestions?

Also, I couldn't find anything really related to my problem using the search feature. However, my apologies if this was already discussed previously.

Thanks,
Q
