---

Rengaurd couldn't find my WOL name and I could never get to the point in Renegade to login before I installed Rengaurd.

Here is what scrolls by in the Rengaurd Box.

```
[02:43] Warning. No WOL Name found. Connecting to WOL will probobly fail
[02:43] Trying to connect to server #1...Connected
[02:43] Secure link established.
[02:43] Welcome to RenGuard !
[02:43] To launch Renegade, please click 'Renegade'.
[02:43] Disconnected from RenGuard network
```

Please help... I have been trying to get Rengaurd to work after reinstalling all my Command and Conquer games from Command and Conquer: The First Decade. I do have the core patch installed and everything is up to date. My computer runs Windows XP and it is up to date.
