Probably because in the last cut scene where you beat the GDI missions, they show Kane walking in the Temple of Nod and being crushed by falling debris.

Actually, in the original C&C (Tiberian Dawn, which is the game icedog90 was actually referring to), if you destroy the Temple of Nod with an Ion Cannon instead of just regular attacks, the end of that video changes. Does anyone know which ending is supposed to be the one that actually happened in the C&C Canon? Take a look at the difference:

Regular Temple Destruction

Ion Cannon Temple Destruction
