Crimson wrote on Sat, 26 August 2006 22:47 For religion to claim that a "god" or "intelligent being" created the universe is just closed-minded. And even IF there was a "god" who put the big bang into motion, it does NOT mean we need to worship it/her/him and it DOES mean that anything in the Bible is more than a big bunch of brainwashing hooey. It also does NOT mean there's a heaven or a hell. I prefer to remain open minded about where we came from until and unless science finds a cause (quantum physics is awesome).

Psuedo-intellectual bullshit isn't going to get you anywhere.
