---

i am going to post any updates here, i have 1.0 out but to break a promise it has not got a ladder built in yet.

i have added:

more memory leaks cleared up;  
a dialog to send commands to FDS;  
a nice little icon to go with it.

download it here: [http://www.help-linux.com/stuff/H-L\\_Bot-1.0.zip](http://www.help-linux.com/stuff/H-L_Bot-1.0.zip)

hopefully for 2.0 i am going to have:

RG server;  
ladders;  
more commands;  
dynamic custom map loading.

i am going to rename it soon as my help-linux site is going down, any suggestions would be much appreciated.
