I don't see how it sounds like crap from that description. The only thing it's about is clarifying things people were worried about (in a good way) and announcing some more things that are from the other C&C games. You probably barely read it at all and just shit on it because you want to. I bet you can't even pull a single thing out of there that is wrong. If you're only hating on it because you don't like RTS games and you only like Renegade, then get out of this topic and stop getting people to go off-topic by insulting you. If you disagree and want to keep throwing shit, then don't expect to see your next posts stay.
