wait...didn't EA appoint XWIS itself to now host WOL.
Which would mean xwis, as the hosts, are not reliable

No, Olaf asked EA to be WOL.

1) I don't have a high horse. I have a cat named Dante.
2) If you can't ping and whois, then you shouldn't be discussing this problem in this thread.
3) You assume too much, thinking that I've only been here for 11 posts.
4) Saying a million meant a lot, and you know that, so fuck off.
5) There is no debate, so my insult meant nothing until you challenged it. Now we're off topic because you can't shut the fuck up.
