well, i finally got it FIXED! i've had this trouble forever and it seems to have been the easiest solution..... i got a can of compressed air blew on the cooling fans in the back of the computer to get rid of dust, and used a cd cleaner, the game INSTALLS FINE, gameplay is great too, now if they could just hurry up and verify my screenname ill be playing online!!

Thanks to all u guys trying to help me out, damn computers are so complicated, im shocked the answer was this simple, im glad im able to join the renegade community
