hi

i am running renegade fds from a second pc at home but when players join they are in 5 seconds then they get broken connection..

on my fds page it says connection broken client 1

connection broken client 2 and so on for every player that joins the server.... but when i join from my other pc i get in fine and i dont get disconnected.

i have never had this trouble before everything has always worked fine..

i have adsl 8mbs downstream and a upgraded upstream rate to 4mbs

my fds connects at 4mbs upstream

please help thanks
