TGPaddy wrote on Sat, 02 September 2006 03:31 Can someone post the command for Visual Studio? OK lets do this really fast.

What version of scripts are you running on your server?

Do you have any basic C++ programming experience?

When you say "if I in game typed !railgun, I would like become a railgun." You want the player to get a railgun OR become and look like a railgun?
