What version of scripts are you running on your server?

Do you have any basic C++ programming experience?

When you say "if I in game typed !railgun, I would like become a railgun." You want the player to get a railgun OR become and look like a railgun?

Just pure spam. I myself began laughing at that line  
if I in game typed !railgun, I would like become a railgun.

I doubt he would want to become one
