yeah help-linux, I saw a special on TV about that sick bastard. I think it's called life for this: Back in the day generally(I guess) older people would be going to jail, and life - being 30 years lets say would prolly kill you seeing as they didnt live as long. A 45 year old man goes to jail for life(30 years). Hes 75 when he gets out - prolly dead. So it prolly just caught the name life casue most people died before their setence was up or before they could get parole.
