ahh...did I make the baby ACK cry? Is he crying because I applied a stereo type to his sorry ass? I think he is. It's ok, little child, I didn't mean anything by it. Go run to your mommies arms and she'll protect you from the cruel world.

I am proud of my experience in Venezuela because I took every day there as a chance to better myself and help tear down the racism that I encountered in California...where as you probably locked yourself in your room and cried yourself to sleep at night. You shall recieve no sympathy for being a racist little bitch. You have already proven yourself to be nothing better than the local slut that needs to give her daily blow job to get praise and help her feel better about herself...but hey, you blow because you care...right?
