jonwil wrote on Tue, 05 September 2006 12:23Basicly, when you join the server, certain files on your machine get compared to the same files on the server, if there is a mismatch, you get the zero bug.
This includes objects.ddb as well as the vehicle w3d files.

Yea I understand what you mean but some w3d files such as The Reborn GDI soldier w3d doesnt give me a start bug yet this one does. Any reason for that?
