I just flipped over twice and had no crash. Do you need to have some general or tactic for it to crash? Does it always crash or sometimes, do you know a way to reproduce this? I tried with and without battle drone and neither crashed, I tried it a few times on another map before, and never had trouble... Do you have the newest dll I posted here? Do you have a crashdump?

[edit]

Quote:I once managed to get a humvee to roll over twice (landing on its wheels again after), and the drone went spinning around with it, going through the floor Very Happy haha
lol
