so I guess when you move you always have access to a computer, which means everybody that moves has access to a computer.

Well.. I guess it's good to know that when I move I'm going to have instant access to a computer

Wow, you people still own 486's or something?

or have you heard of the term "laptop". Now I know this might be a hard concept for some of you to grad, but it is basically a computer than you can have with you, even if your in antartica, let alone moving....

great being up with the times grandpa!

BTW, you probably are one of those guys in their 30-40's that have nothing meaning full, so they turn to video games, ROFL

K first of all, good job trying to act cool. I don't know what a fucking "486" is, although I'm assuming it's a computer because of the context. Don't try to act like you're some hot shot teenager and we're all a bunch of 30 year old losers when you're the one bringing up computers no one's even heard of in order to sound cool when in the end you end up looking like a nerd.

I'm 16 years old, in college, taking Computer Science.. Yeah.. I think I'd know better than you what a laptop is, their advantages/disadvantages and whatnot. All I know is that if I wanted or needed one, I could probably go get one tomorrow, but the truth is that 1000 dollars isn't worth something I'd never use.

Anyways, not everyone has the need nor the money to buy a laptop, therefore not everyone can always have access to a computer. But why am I explaining this? It's fucking obvious. The thing is that you know that you're wrong, you're just too arrogant to admit it like it's common with you

grade 9/10 morons.

Now, about your website.. It wouldn't happen to be this one, <http://www.trpmclan.tk/> - would it? Because you didn't even make that shit. That's a template you download from well, I forgot the website. And even if you did make it, ANYONE can make that shit. It's just tables and simple photoshop. I apologize for saying that if this isn't the website you're talking about, but if it is then lol, you're a fucking joke.

troopr02 wrote on Fri, 08 September 2006 19:02 That what I said when I saw how you played

Anyone who knows who de7 is will agree to the fact he was one of the greatest players ever. You, on the other hand, are AT THE VERY MOST average - and only to public server retard standards. By that I mean that being average still means YOU SUCK, because compared to even the worst player from the clanwars community, the best public server moron you can come up with wouldn't stand a chance. Stop acting like you know what you're talking about and stfu before you make yourself look even more stupid.

This isn't worth arguing about, so drop it and move on, kid.
