Hmmm.. I tryed the BlackIntel Server FPS thing, configed it to stay at 60, but it always goes tot he default

[SFPS]

```
; SFPS =
```

```
;
```

```
; Set this to altar the maximum server fps. We are unsure wether you gain any benefits  
; from this. The default is 62.
```

```
; Note: You cannot set the value to anything outside of this range 8-1000
```

```
SFPS = 60
```

^thats what i have, and everytime I start up the fds, i get 62
