Subject: And the big feature in scripts.dll 3.0 is...
Posted by jonwil on Tue, 12 Sep 2006 11:09:00 GMT

...A complete functionally identical clone of the Test_Cinematic script used to run cinematic text scripts. (with any luck it will be functionally identical, as with cloning anything this complex one can never be 100% sure without a lot of testing)

There are other big features but I cant talk about those yet
