omg... of course you can "create" a non existing channel.. im pretty sure you are (again) doing something wrong.. just try "JOIN #bla12345".. it should work and it should not exist..

but all your questions are answered in the mentioned IRC RFC... and you just say it doesnt help... so you just didnt read it, did you?

so open it again and read point "4.4 Sending messages" for your "talking in channels" problem.. you will see the PRIVMSG command then.....

perhaps you should get yourself another hobby
