It's hard to make an estimate of when something is released, you could run into a lot of problems in the meanwhile. People will not like wrong estimates either, so if someone says "it will probably be done ..." and it will not be people will keep asking why and stuff. I think that's why a lot of developers (including myself usually) do not want to give an estimate. So: don't ask, only hope it will be done soon.

"are does no1 understands this answer?"
