I just uploaded all the unfinished models and textures from WW2: Warpath it's what Genocide wanted

I have even included the map meshes and vis for Tobruk - hybrid_forest forgotten_town and dm_utah so you can see how truly bad at map making I was back then but it maybe helpful for the new guys

my user name on renhelp is Halo38 (obviously)

I'll also be uploading everything that I have made that I never used in renegade - expect alot of different creative stuff. unfinished maps, buildings, objects etc.. i'm putting those packs together now
