MaidenTy1 wrote on Thu, 14 September 2006 03:48Crimson wrote on Thu, 14 September 2006 03:33Sorry, but I can't say one way or another about you hacking or not hacking the forums until I can locate my logs from that time and figure out what you said to make me believe it was you. Then I'll refresh your memory.

At the time, I was on reasonably good terms with three parties: yourself, Olddust, and Jschultz. (to elaborate: co-owner of NoN00bs with Olddust, server mod at N00bstories and a long-time n00bstory writer, and just a general buddy of Jschultz) Funny how things change, eh?

Jschultz rented a server from Olddust and it was called N00bstations. It became rather popular and you became somehow affronted at its similar name to "N00bstories". Kholdstare decided to ddos N00bstations repeatedly. At roughly the same time you demanded their change the name of their community. Timing, for all I know, could have been a complete coincidence so I'll not make any accusations in your direction about the ddos attacks.

Me being in the middle of it and having a measure of respect for all three parties (not Kholdstare, obviously) didn't really want there to be a big ugly ddos-war, so I decided to try to negotiate some kind of peaceful solution with myself as a kind of mediator. I went to Olddust first: he said fine. I went to Jschultz: he said fine. I went to you, and your response was de-modding me from N00bstories (hardly a big deal since I rarely if ever played in public servers at the time) and telling Jschultz that if you didn't get your way, you'd publicise the accusation that NoN00bs was responsible for "Renguard's recent downtime". Completely fabricated, of course, and you knew it. That wouldn't stop many people believing it if you said it was true, though, and I think you knew that too.

Hi spoony, still have a pole up your ass I see.

Ahh yes, Jschultz. Thief and overall fuckwit. After his (pathetic) attempts to attack the IRC network he resorted to attacking crimson's renegade servers. I thought he would like a taste of his own medicine. this was done on behalf of no one but myself. I do not like people who fuck with networks I frequent, period. Also note that a known (now patched) FDS exploit != DDoS.

EDIT: Yes I know this is a late reply, no I don't care what you have to say about it.
