Blazer wrote on Fri, 15 September 2006 11:05BFG lost my video card so they replaced it with their most expensive model, the 7950-GX2. It does have some drawbacks for me though, since I use dual monitors, and when you are in SLI mode you can only use one monitor. The driver lets you switch between modes though so now I run dual monitors when Im semi-working or for playing Renegade (I get 100+ FPS in renegade even only using one GPU). For Battlefield2 I can go SLI and get 120FPS with max detail

Great because i'm getting two of them, but will both of them SLI'ed together support four monitors?
