When I was playing on a server (20vs20) I saw a 1vs1 fight in the middle of the map (C&C\_Complex) I was Nod and I saw that the GDI player was a Hotwire and shot the other Nod player with a handgun. Then I almost got shot, but got away to the Nod base. The cheater got in the Nod base and killed more with the handgun, many more players said cheater. The server bot was down so RG didn't help, then there come a mod over the IRC, and said "you need prove" I said "the cheater shot my stank in 5 shots" then the mod said "you need a screenshot" ... Did that mean that I fist need to take a screenshot, post it to there website and wait a day, so to cheater get banned, but in the meanwhile we just need to accept the cheater?
