umm, like this:

(Found here: <http://www.cnc-source.com/files/pafiledb.php?action=file&id=523>)

It'd come up on land and the ramp would drop and it'd wait, if someone drove a tank or something onto it, the ramp would come up and it'd take u to the enxt island over, and then go back to the original island. Id suspect thered be 2 or so going in and out from each island.

That craft is already in Renegade:
