umm, like this:

(Found here: <http://www.cnc-source.com/files/pafiledb.php?action=file& ;amp ;amp ;id=523>)

It'd come up on land and the ramp would drop and it'd wait, if someone drove a tank or something onto it, the ramp would come up and it'd take u to the enxt island over, and then go back to the original island. I'd suspect there'd be 2 or so going in and out from each island.

That craft is already in Renegade:

OMG!

now that is a hell-of-a lot of vehs.
