...but have no proof, as, by the time i started looking out for evidence which i could ss, it was too late, as he was kicked shortly after i started getting them.

i got one, which was of me !RGing him:

he was using a repair hack, and how i found out was like this:

im in a crazy dm server (renz0r) and the map is m10. he is in an orca, and i start shooting him with a laser rifle. anyway, when his orca was nearly dead, he landed on the CY. the target box was still up, and it was repaired almost instantly.

anyway, since i have no proof, he cant be banned from rg, but i thought i'd warn a few server owners
