Subject: Rengade Ports
Posted by gibberish on Mon, 26 May 2003 03:51:32 GMT

Hi All,

I believe people can connect through my firewall regardless of weither they have a firewall or not.

I allow the following ports outgoing:

3845,4005,4321,4850,7000   (All TCP)

And the following port in both directions:

4848 (UDP)

I have set the port in Renegade to 4848 but I believe 4848 is the default if people don't set it anyway.
