danpaul88 wrote on Thu, 28 September 2006 19:52console commands can only be run from the server... and if someone hacks your server they wont bother using commands like give_money...

That's not the point,

the question is, if you can trust all serverowners.

For example you could give your team in a clanwar more money

and the enemy clan wouldn't recognize it, or if you just host

a game with the renegade client, you could abuse it too...
