park near a pt

Then aim at the front of the apc, while still being able access the PT

Then get a rythem going. Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5"

Do it as fast as you can, to other people you will just be spitting out c4.

it looks really odd.
