Then aim at the front of the apc, while still being able access the PT

Then get a rythem going. Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5", Click, "E", "5"

Do it as fast as you can, to other people you will just be spitting out c4.

it looks really odd.

Not really...to other people looks like I'm just throwing out random c4, not pileing them ontop of eachother...is it some sort of script?
