Thanx both,

For the explaining and the offer. I will try it out myself first and i need help (don't wurry i need:)) i
will come back to you.

I am also making a new map i want to use for it. Thats i bit diferent. I am happy that gmax imports
autocad and that autocad 2007 has a 3D engine inside.

Only the renegade editor is very slow.

But maybe i have configure something

Anyway thanks till now

Greetings Rene
