Well, lets see here..

mIRC scripting is quite easy to do..

Of course, when you have a LARGE SCALE build like BR, and have excellent knowledge of comp language, like so C++, then why not do it?

BR has a long time running thing going in renegade. Its only fair its made in a complex language. CloudyServ is maintained by a dude who only knows IRC scripting afaik.. And it hasn't even reached a full version yet (0.982 latest)
