a,Firstly you show me anywhere in this thread where ive said Dan from CW cheats --Go on just once ??????? thats right you cant.So plz stop telling me i have said it ;)you are making yourselves look stupid by continually saying i have.

I'll give a \$1000 to the first person who finds and posts where i have called him a cheat.I can find you quite a few posts where you keep telling me he isnt/doesnt cheat tho ~~~Offer still stands \$1000 for the first person to show ME where ive called him a cheat.

You are saying the guy is in the server that you were playing with/against was cheating. That guy, is Dan from CW. As you can obviously see by him explaining he took an orca.

b,New to this game makes no diffrence to ANYBODY who wishes to complain/question what somebody has done,Ive played this game since it was just a demo level (Under)~~Infact i was the 73rd person to D/L the demo,Does this somehow make my word more valid than somebody who has never played the demo level ???If you think it does then you deluding yourselves <---all that means i can say things like ""Arrrr i remember when no helis were available,Arrrr i remember when clans use to get 3 artys and 3 fixers and just whore buildings,Arrrrrr the good old days"" Or "Arrr when i was a lad you use to be able to get the stats for amount of bullets fired,Hits to the arms/torso/head were all available.

I don't know what the fuck you're talking about here. Did someone even mention anything about "new to this game"? Besides the point, if you didn't know that copters rule in public and you've been playing since demo, then I have to make the assumption that unless you're really stupid (we're not ruling this out now) than there is no way in hell you wouldn't have realized that copters rule, if you've played since the demo. So pick and choose. However, on this point I would like to add that someone who's played since the demo *SHOULD* have the knowledge of knowing how much damage a unit does and everything. Unfortunately, there have been a lot of people who claim playing for however long and still doesn't know fundamentals, like that a GDI soldier does more than a Nod one.

c,Old player/New player ---Okay then in all my time playing this game(100s of thousand of games)had me own server --only just got rid of renegade in the server box--and put 2142 in renegades place ---in all that time Ive never seen/been held down so convincinly by 1 person in a heli ~~4 shots from a havoc and not 1 touch him ???

It's no ones fault but your own if you can't hit a helicopter. They're not very small targets, you know. You have to actually *HIT* the copter, in order to do some damage. It's pretty obvious that you haven't played against any of the best pilots - Yes, Dan would be up there, and he's definetely smart enough to use his surroundings to his advantage (ie "looping" under the bridge to kill a bunch of snipers from behind). I say looping because some guy who bought a sakura the entire game yesterday said all that I could do was loop with a copter to kill his sakura even though all he did was buy a sakura the entire game.

As for his stats, Probably 80%+ of the time I play City Flying from the start, I'll have at least 4500 points and over 30 kills. So has mrpirate, and I'm sure I could name other people. That very game I was talking about I had over 6k points and about 30 kills, mrpirate had more kills, but a little less points. The reason why people who buy havocs are so easy to kill for us, is that they are not good players. The fact that they use a ramjet to have to kill copters suggests this. They never actually dare trying to use a copter to kill a copter - no - they wouldn't, instead they spend the entire game buying havocs and losing them, and for each havoc killed is a nice 100 points.

LOL you really are your own worst enemies.

uhh.... OK? You have absolutely no proof what-so-ever that he cheats. I'm sure spoony has enough connections to get the jelly admin to post the logs, and there won't be anything wrong with them. If you think it's "impossible" to kill 3 havocs within 3 seconds - you are wrong.

What Goztow posted is indeed the truth ---we all no people can and do by pass renguard ---The worst type are the people who no how to play the game and still do it <---what makes it ten times harder if you get 30 people jumping to there defence.

AGAIN - WHY, OH WHY would we believe anything you have to say, when you have NO PROOF? The only thing you're telling us is that some n00b players died by some guy who is good at this game, and has been good at this game, and even when RG 1.04 comes into town, will STILL be good at this game. Which, I'm hoping to come out soon, just so people can start accusing me of bypassing renguard again after the first week it's been released. Which, by the way is the neverending cycle. Y'see, people will keep saying so and so bypassed renguard and they'll say "well this RG isn't perfect, wait until the next and we'll see if you're truly this good" Next RG comes out, "wow bypasser, ban again" Like one week after the original RG came out, we were already accused of bypassing it. Now, maybe we're just awesome code breakers or whatever the hell you need to be to bypass, and we just happen to do it faster than some anti-RG retard who spends his life trying to bypass renguard. Or..... Maybe we're just good players, who've played a lot of clangames, where the real incentive to be good is at?

i tell you what ---forget it--you enjoy your games,and keep ignoring people who say certain people aint playing this game on a level playing field.

Don't try and play that card. You have absolutely no proof what-so-ever and you expect us to flock to ban him, when you have absolutely NOTHING? Soapdirt killed 3 havocs really quick! he was untouchable (even though I'm terrible at aiming)! Ban him! ban him! he bypassed RG and then killed my conjoined twin!/[sarcasm] If you have any proof of him cheating - which you won't find, because he doesn't - than you look like a complete idiot, especially if you say something like "he had 30 KD and 4500 points" Which is... a common score among people who know how to copter. Hell, I'm sure ack was good enough with a copter to agree. Would you believe it was possible if ack came in here and told you it was? No, that would admit a mistake. I'm not saying to question every person you meet that you think might be cheating, because they might as well be - but what Dan did is nothing short of what anybody can do, if they had the heart to be good at this game.
