Does anybody know why the GDI_MRLS falls through the floor when a script spawns it?

EG: Kill the CnC_GDI_MRLS will spawn a GDI_MRLS (one you cant enter) as the "wreckage" and will replace with a CnC_GDI_MRLS when repaired. But.. it falls through the floor always :S

```
if (strstr(Commands->Get_Preset_Name(obj),"CnC_GDI_MRLS")) {  
    DestroyedTank = Commands->Create_Object("GDI_MRLS",DeadPlace);  
    Commands->Set_Facing(DestroyedTank,Facing);  
    Commands->Attach_Script(DestroyedTank,"KAK_Vehicle_Death","1");  
}
```

...

```
else if (strstr(Commands->Get_Preset_Name(obj),"GDI_MRLS"))  
{  
    DeadPlace.Z += (float)1;  
    DestroyedTank = Commands->Create_Object("CnC_GDI_MRLS",DeadPlace);  
}
```

Above is the code that i changed in ssaow 1.5's aow.cpp, is there anything wrong here? Or is it a vage bug that it always falls through the floor? :S

Thanks for your help
