Well hello.

I am just posting to give explination for my actions. in the Month of July of 2006, i made a decision to quit renegade for good. So I wanted to go out with people remembering me. So I cheated on Virtually EVERY server on the XWIS list. I was Froce rg'd the first time around then used a Renguard bypass called (*cheat name removed*) Which I was beta testing for 0X90. After I went back into every server again and finally got banned via IRC onto my IP. But I didnt stop there, I changed my ip and did it numerous times and pissed off alot of people. The only server that I wanted to piss off the most would be Justin Scholtez Server, Since he ripped off a good friend of mine for $1,080 US.

I am here to make amends with the community and apologize for my actions in July, I would like to eventually get back into this community (if allowed). I would also like to mention that "CyberPunk" the so called king of Renegade cheats has left the online gaming community for now and more than likely for good. (<WEBSITE REMOVED>) and (<WEBSITE REMOVED>).

Thank you for your time. And Sorry for my idiotic / immature tactics
