As its a public forum, anyone is allowed to post both positive and negatively.

If you came here expecting all players to tell you how to learn such a noobish tactic then you are sadly delusional.

Some will and some wont, tough, learn to live with it.

Noobs ruin the game, but even the newbies dont use Flaming Apcs. Learn to play the game properly and you wont need a Flaming Apc to attack. Better still learn some Team-play, thats a great tactic that alleviates the problem of your base being over-run by vehicles and needing to use Flaming Apcs.

Maybe you could teach me some of this teamplay sometime, you seem like a pro playa, I usually just flame apc's for the whole game!
