no, i mean the script that is supposed to change your character without losing weapons/armor, the one that's supposed to be in the stealthsuit\_ssaow15\_scripts.dll; it doesn't even seem to show any scripts in there that i can attach to the suit by itself. you had said before about the Change\_Character, but i don't know the exact name and that name alone can't be found even with all the scripts in place.
