OK, here's a better list of the top servers. I removed a few more that were only up for less than a day. The "Record Count" column represents how many stats I have for the server which is taken once per minute.

```
name    average_players max_players utilization record_count
n00bstories.com AOW/CCM  37.6380  40  94.095  75891
n00bless.com All Out War 24.3339  32  76.0434375 73816
Jelly-Server [Mini AOW]  13.5998  20  67.999  44919
www.Jelly-Server.com  25.4129  42  60.50690476 108959
Fnfall's AOW Server  17.9689  36  49.91361111 75676
~XpHaZe Marathon~  15.6018  32  48.755625 35545
[DS] Black-Cell.net - Marathon 15.5271  32  48.5221875 75766
Fnfall's Marathon Server 17.1150  40  42.7875  73412
UNRULES.COM - New Maps  17.0991  40  42.74775 75446
Fan-Maps.net - CoOP  6.1347  15  40.898  43459
```

The stats for Jelly are messed up because they had both their AOW and mini AOW named identically which resulted in fucked data. In fact their utilization is definitely a lot higher. If I can figure out when they fixed the names, I can find a more accurate utilization stat.
