dthdealer wrote on Sat, 04 November 2006 19:58i cant really be reported cheating when using renguard can i anyway?

If Renguard was reliable, all they could do was accuse you of not following server rules, if the server requires a Core Patch for you to play. (Type !rules and read them carefully). This isn't so much "cheating/haxing" as it is "breaking the rules". Neither of which should be done.

However, Renguard is unreliable and has been exploited, so people can still accuse you of cheating, even if you do use it.
