A fix for the PT bug has been devised and is currently being tested on the n00bstories.com AOW/CCM server. If you get the PT bug while on this server from this moment forth, please let Sir Kane or inetknght know.

For those of you that do not know, the PT bug is where you're not able to open the purchase terminal after connecting to the server. The workaround to the bug is to die once... after that, you can access the PT bug until the next time you connect to the server.
