Dave Anderson wrote on Thu, 09 November 2006 20:48 You're right. It has horrible syntax and is an unstable language. However, a lot of people are attracted to it because of its "English like" syntax.

And C++ and such don't have ""English like" syntax"?

Also, Java and VisualBullshit are NOT a good language to start with. About all languages are "easy" to learn, difference is that VB and Java are slow and are rather limited.
